Message from the Guest Editor

This Special Issue brings a collection of current research that addresses the use of different types of nanomaterials investigated in electrochemical sensors and biosensors and their advantages for detecting or diagnosing different substances of medical and environmental interest.

Keywords

- nanomaterials
- electrochemical (bio)sensors
- sensing units
- nanostructured films
- clinical diagnostic
- environmental detection

Message from the Editor-in-Chief

Chemosensors is an international, scientific, open access journal on the science and technology of chemical sensors published by MDPI. All articles are released on the internet immediately following acceptance. The journal publishes reviews, regular research papers, and communications. The scope of Chemosensors includes:

New chemical sensors design
Electrochemical devices, potentiometric sensor, redox electrode
Optical chemical sensors
Analytical methods
Environmental monitoring
Gas detectors
electronic nose, etc.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Instruments & Instrumentation*) / CiteScore - Q2 (*Analytical Chemistry*)
