ARGANS, Sophia Antipolis, France

Deadline for manuscript  
submissions:

**closed (15 July 2019)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue comprises papers presented at the International Conference on Ozone and Plant Ecosystems (2<sup>nd</sup> Ozone and Plants Conference), held from May 21 to May 25, 2018, in Florence, Italy. Excellent contributions from those who did not have the opportunity to attend the conference will also be considered.

This conference allowed all experts in the interactions between ozone and plant ecosystems to meet and discuss the state-of-the-art and strategies for continuous improvements. The three main subjects of the conference were:

1. Monitoring, modelling and assessing the risk of ozone damage to plant ecosystems
2. How plant ecosystems respond to ozone exposure
3. How plant ecosystems affect ozone concentration in the atmosphere

The Guest Editors invite papers that promote and advance the exciting and rapidly-changing field of Ozone and Plant Ecosystems. Papers which exclusively deal with any aspects of tropospheric ozone (physics-chemistry) are also welcome.

Dr. Evgenios Agathokleous

Dr. Elisa Carrari

Dr. Pierre Sicard
