

Design, Manufacturing and Measurement of Optical Film Coatings

Guest Editor:

Prof. Dr. Yi-Jun Jen

Department of Electro-Optical
Engineering, National Taipei
University of Technology, Taipei,
Taiwan

Deadline for manuscript
submissions:

closed (31 July 2019)

Message from the Guest Editor

Optical coatings have been widely applied in various optical devices to perform antireflection, high reflection, beam splitting, and bandpass filtering. Optical coatings are desired that offer more advanced performances, such as ultra-thin perfect absorption, perfect phase retardation, and wide angle bandpass filtering.

Contributions to this Special Issue are welcomed on all subjects related to including design, manufacturing and measurement of manufacturing of optical thin film coatings. Especially, welcome are papers that raise new questions and new possibilities or examine old problems from a new angle.

Special Issue

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New
Ceramics and Fine Processing,
School of Materials Science &
Engineering, Tsinghua University,
Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam
Mickiewicz University in Poznań,
ul. Wszechnicy Piastowskiej 3, 61-
614 Poznań, Poland

Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
