Advances in Flexible Films and Coatings

Guest Editors:

Prof. Dr. Marta Marszalek

Department of Materials Science, Institute of Nuclear Physics Polish Academy of Sciences, ul. Radzikowskiego 152, 31-342 Krakow, Poland

Dr. Michał Kupiński

Department of Magnetic Materials and Nanostructures, Institute of Nuclear Physics Polish Academy of Sciences, ul. Radzikowskiego 152, 31-342 Krakow, Poland

Dr. Yevhen Zabila

Department of Materials Science, Institute of Nuclear Physics Polish Academy of Sciences, ul. Radzikowskiego 152, 31-342 Krakow, Poland

Deadline for manuscript submissions:

closed (20 November 2020)

Message from the Guest Editors

Dear Colleagues,

The Special Issue will concern the fabrication, properties, and applications of flexible thin films, coatings, and membranes. For example, rapidly developing printable electronics and sensorics opens new fields and creates challenges that stimulate the search for new materials with novel properties. In particular, it is necessary to find the analogs of conventional electronic elements, circuits, and devices. Therefore, advanced fabrication, patterning and functionalization methods are demanded for future progress in the field of flexible materials.

In particular, the topics of interest include, but are not limited to:

- Flexible thin films, composites and polymers;
- Free standing membranes;
- Advanced fabrication, patterning and functionalization techniques;
- Bendable and strechable coatings;
- Flexible electronics and sensorics;
- Printable electronics;
- Membranes for medical and environmental applications.

IMPACT FACTOR 3.4

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. Coatings is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers on the hottest topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
