## **Structural Mechanics of Construction Materials**

Guest Editors:

Message from the Guest Editors

Dr. André Furtado

Dear Colleagues,

Dr. Aires Colaço

Dr. Ana Ramos

Dr. Cláudio Horas

Dr. Sérgio Pereira

Deadline for manuscript submissions:

30 October 2024

The structural mechanics of construction material covers multiple fields, such as development on the planning, design, performance evaluation, and maintenance of civil engineering structures, such as steel, reinforced concrete, prestressed concrete, and composite structures. mechanical Particularly. studies on the and physicochemical behaviour of construction materials and the development of new structural types, new construction methods and new materials are also the focus of continuous evolution. This Special Issue is open to research works developed within these topics. We invite the submission of new research, case studies, projects, reviews, and state-of-the-art discussions as well.
