Deadline for manuscript  
submissions:

**closed (31 January 2018)**

### Message from the Guest Editor

Dear Colleagues ,

It is increasingly apparent that both the structures and dynamics of enzymes are crucial in order to understand their functions. A wide array of techniques is now available, which allow the dynamics of structures and the time-dependence of enzyme reactions to be studied at the atomic level. Both experimental studies and computational simulations provide key insights into mechanisms.

This Special Issue on “Structure and Dynamics of Enzymes” is intended to produce a highly topical collection of articles exploring the relationship between enzyme structure and dynamics. Scientists working in a wide range of disciplines are invited to contribute. We welcome experimental and computational contributions, and combinations of the two.

Dr. Mike Hough

of Pisa, 56126 Pisa, PI, Italy

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
