Message from the Guest Editors

Dental implants are becoming the primary and preferred treatment for patients to replace missing teeth. But recent prevalence studies have indicated that dental implant failure rates are significantly increasing. These failure rates are largely due to peri-implantitis and initial forms of peri-implantitis (peri-implant mucositis).

There is no consistency and congruence of the causes of peri-implantitis. The proper diagnosis and treatment of patients prone to peri-implantitis is of increasing importance, in order to identify the risk factors prior to surgical implant placement and implement appropriate maintenance therapies.

This special issue aims to provide new information on the prevalence, diagnosis, etiology, risk factors and pathological mechanism of peri-implantitis. It will also focus on advances in treatment, and new preventative and maintenance measures for peri-implantitis, and cover the effects of systemic diseases and metal allergies relating peri-implantitis. This Special Issue welcomes laboratory and clinical studies from around the world to offer their solutions for peri-implantitis treatment and management.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Claude Jaquiéry

Department for Cranio-Maxillo-Facial Surgery, University Hospital Basel, Spitalstrasse 21, CH-4031 Basel, Switzerland

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **PubMed**, **PMC**, and **other databases**.

Journal Rank: CiteScore - Q2 (*General Dentistry*)
