Message from the Guest Editors

The caries burden of children and adolescents in industrialized countries has been reduced in recent decades. Between 1994 and 2020, the incidence of caries in 12-year-olds in Central Europe was reduced by more than 80%. This resulted in less need for invasive restorative therapies in the permanent dentition. As a result, the focus of pediatric dentistry was increasingly directed towards other disease patterns.

Gentle caries management based on modern methods of caries diagnosis and minimally invasive intervention with the aim of largely preserving healthy tooth structure has also become increasingly important in recent years. However, children and young people with disabilities, chronic diseases and rare diseases have benefited much less or not at all from this trend. The dental care of this population group represents a particular challenge for dentists.

These positive developments give reason to collect and publish various papers on the subject in a Special Issue with the topic “Current Advances in Pediatric Odontology”. The focus is on the development and optimization of prevention programs for children.

Welcome to contribute!

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **PubMed**, **PMC**, and **other databases**.

Journal Rank: CiteScore - Q2 (*General Dentistry*)
