Physical Diagnostics and Dental
Physiotherapy, Pomeranian
Medical University in Szczecin,
70-204 Szczecin, Poland

Deadline for manuscript
submissions:

10 September 2024

Message from the Guest Editors

In the 21st century, dentists often meet with patients suffering from ailments of the stomatognathic system and the surrounding tissues of the head and neck, which they can face challenges in diagnosing and treating. These problems often come from the myofascial and joint systems. They are usually the result of long-term stress, patients' mental problems, and untreated or inadequately treated malocclusion. Often, the treatment of a patient requires the cooperation of a dentist and a physiotherapist in such cases. The Special Issue aims to bring together multidisciplinary approaches to the dysfunction of temporomandibular disorders and myofascial disorders in a basic and clinical aspect. We hope that the current views in this issue will allow us to assess diagnostic and therapeutic perspectives and develop and familiarize ourselves with new research related to multidisciplinary viewpoints.

Medicine, dentistry, and physiotherapy are interdisciplinary sciences that seek solutions to facilitate diagnosis, accelerate treatment, and postoperative rehabilitation.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **PubMed**, **PMC**, and **other databases**.

Journal Rank: CiteScore - Q2 (*General Dentistry*)
