Message from the Guest Editors

Dear Colleague,

This Special Issue welcomes original research articles, reviews and case reports (with good quality photos) related to preventive dental care. Preventive strategies include but are not limited to oral health promotion, early diagnosis, the assessment or management of oral diseases and conditions, novel dental care protocols to lower disease levels, and the rehabilitation of oral function. Strategies can be considered at both individual and community levels.

This Special Issue will provide readers with up-to-date information on preventive dental care in minimizing severity of diseases. Further, it will raise awareness of the importance of preventive actions for dental professionals as well as general readers.
