Deadline for manuscript  
submissions:

**30 June 2024**

### Message from the Guest Editors

Dear Colleagues,

Cerebrovascular disease encompasses a broad spectrum of pathologies, and it is increasingly evident that both common and rare genetic diseases play a significant role in their development. Understanding the genetic underpinnings of cerebrovascular pathologies is crucial for accurate diagnosis, prognosis, and the development of targeted therapeutic interventions.

In this Special Issue, we aim to explore the intricate relationship between genetic diseases, such as ADPKD and Marfan syndrome, and cerebrovascular pathologies. We invite contributions that delve into the genetic mechanisms underlying cerebrovascular complications in these conditions, including the identification of specific genes or mutations associated with increased risk. Additionally, studies elucidating the molecular pathways and cellular processes involved in the development of cerebrovascular diseases are highly encouraged. Finally, articles regarding advanced vascular imaging techniques are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*)
