submissions:

30 June 2024

Message from the Guest Editor

Oral squamous cell carcinoma (OSCC) is one of the most malignant tumors across the world. Overall, the survival rate of OSCC patients is poor. Novel biomarkers or targets may provide new insights and options for the prediction and treatment of OSCC.

This Special Issue is entitled "Biomarkers and Therapeutic Targets of Oral Squamous Cell Carcinoma" and aims to present research on predictive markers, prognostic markers and therapeutic targets with their related mechanisms.

In recent years, immunotherapy has revolutionized cancer treatment, including OSCC treatment. However, the limited response of immunotherapy remains a significant problem, which we must face. Thus, biomarkers and targets related to the immunology of OSCC may be a promising option.

Authors are welcome to share original articles and review papers that present the latest research results and progress.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
