Dr. Cristina Mondello
Legal Medicine Section, Department of Biomedical and Dental Sciences and Morphofunctional Imaging, University of Messina, Via Consolare Valeria, 1, 98125 Messina, Italy

Gennaro Baldino
Legal Medicine Section, Department of Biomedical and Dental Sciences and Morphofunctional Imaging, University of Messina, Via Consolare Valeria, 1, 98125 Messina, Italy

Deadline for manuscript submissions:
15 September 2024

Message from the Guest Editors

Understanding the cause of death in the forensic setting can be difficult and autopsies alone may not be conclusive, making the assessment of the dynamics which lead to death a challenge. Further issues in forensic pathology include the identification of the victim, the post mortem interval (PMI) estimation, injury vitality, and age estimation. In several cases, forensic assessment needs a multidisciplinary approach in which the forensic pathologist integrates his skills with other figures/specialists, such as toxicologists, anthropologists, odontologists, radiologists, entomologists, geneticists, and engineers. This cooperation has allowed innovations in forensic practice and the development of new diagnostic strategies.

This Special Issue aims to include scientific advances and perspectives for the developments and discoveries in all fields of post-mortem forensic diagnostics. To this scope, the Special Issue will include scientific articles on all the forensic methods/investigations/analysis useful to reach a clear post-mortem diagnosis.

Special Issue

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
