Popa” University of Medicine and
Pharmacy, 700115 Iasi, Romania

Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editors

The relationship between inflammation and modern human diseases (e.g., diabetes mellitus, cardiovascular disease, obesity, cancer, renal disease, autoimmune diseases, and others) is still an unsolved mystery in medicine and biology. Inflammation is a protective reaction to detrimental stimuli that inevitably takes a toll on the physiological function of the tissue in which it occurs. Although we have evolved tremendously as a species, the evolution of genetic adaptation and the inflammatory response has not been able to keep up with the rapid changes in our environment, inducing escalating amounts of dissonance between the modern environment and selected traits. As a result, various tradeoffs affecting human physiology are not optimized to the modern environment, leading to heightened disease susceptibility.

The aim of this Special Issue is to accommodate a wide variety of original research but also review papers centered on inflammation. Moreover, we wish to integrate various disciplines and areas of study in the medical field so as to convey a novel perspective on this topic.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
