Message from the Guest Editors

Dear Colleagues,

Respiratory illnesses, acute or chronic, impose a significant health burden and are responsible for a large number of hospitalizations. Despite the recent focus on acute respiratory infections due to the COVID-19 pandemic, chronic respiratory conditions such as asthma and chronic obstructive pulmonary disease (COPD) remain significant health challenges. Acute respiratory tract infections can lead to pneumonia and the subsequent development of acute respiratory distress syndrome (ARDS), which can result in a mortality rate of around 30–50%. COPD, lower respiratory tract infections and cancers related to the respiratory tract are among the top 10 causes of death worldwide. Therefore, improving our ability to diagnose and manage patients with respiratory illnesses is a critical research priority. This will enable us to target specific clinical phenotypes and improve patient stratification, leading to better clinical trial methodology and individualized patient management.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
