Message from the Guest Editor

Dear Colleagues,

In recent years, ultrasound imaging technology has been widely used and has played an increasingly important role in diagnosing and treating skin diseases, providing a large amount of key visual information in order to meet the challenges of complex skin diseases. Skin ultrasound imaging is a new technology category that is clinically widely endorsed. In this context, the large-scale application of ultrasound in skin diseases has gradually gained attention. In this regard, we would like to set up a new Special Issue on applying ultrasound imaging technology in skin diseases and focus on publishing some of the latest, high-quality, and excellent clinical research.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
