Deadline for manuscript submissions:
closed (31 March 2020)

Message from the Guest Editor

Dear Colleagues,

Melanoma and skin cancer remain prevalent diseases worldwide, with high mortality rates for metastatic melanoma. Recent advances in early diagnosis and improvements in cancer management have led to early detection and increased survival of patients.

This Special Issue aims to include original reports and review articles on topics such as the cellular and molecular bases underlying melanoma and skin cancer development and progression, diagnosis and early detection, molecular testing and genomic approaches, biomarkers of cancer immunotherapy, and targeted therapy.

Dr. Chyi-Chia Richard Lee
Guest Editor

Special Issue

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
