Message from the Guest Editor

Dear colleagues,

This Special Issue builds from the 2020 issue on the topic of “Epigenetics and Disease.” Epigenetic mechanisms regulate the broad synchronization in patterns of gene expression that ultimately dictate cellular consequences. Aberrations in these epigenetic mechanisms are known to be associated with a range of diseases. This correlation between epigenetic aberrations and disease is the continued focus of this 2021 Special Issue of *Diseases*. For this issue, we invite papers related to the molecular, cellular, and clinical significance of epigenetic aberrations as well as treatments based on the modulation of epigenetic mechanisms in the clinical management of disease.

Dr. Mark Brown

Message from the Editorial Board

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Medicine, Research and Experimental)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.7 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
