Deadline for manuscript submissions:
closed (30 September 2023)

Message from the Guest Editors

Dear Colleagues,

The diversity of algae and cyanobacteria is extensive in aquatic and terrestrial ecosystems, where they act as important primary producers. Even though genetic studies of different taxonomic groups have recently intensified, the rate of discovery of novel biodiversity remains relatively high. Phylogenetic studies can provide insights into the evolution and biodiversity of cyanobacteria and algae, as well as their biogeography and systematics in general. In this Special Issue, we encourage the submission of manuscripts that describe the phylogenetic relationships of different taxonomic groups of cyanobacteria and algae, especially those from under-sampled taxa, unexplored environments, and those exhibiting cryptic diversity among species.

Prof. Dr. Gabrielle Zammit

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
