### Message from the Guest Editors

This Special Issue of *Educational Science* focuses on game-based learning supported by mobile devices, a technology with a high penetration rate in our societies, even among the young population. The aim is to collect a set of strong contributions presenting new knowledge on the design, development, implementation, monitoring, and efficacy assessment of game-based learning mobile environments, to promote best practices and the integration of mobile educational games in educational settings.

Recommended topics include, but are not limited to, the following:

- Design and development of mobile game-based learning
- Efficacy assessment and quality issues in mobile game-based learning
- Pedagogical models and learning theories in mobile game-based learning
- Teacher acceptance and adoption of mobile game-based learning
- Integration of augmented reality or virtual reality in mobile game-based learning
- Mobile game-based learning in educational settings: formal (K-12, higher education, continuing education, special education, teacher education), non-formal, and informal education; face-to-face, blended and distance education
