Deadline for manuscript submissions:

31 October 2024

## **Message from the Guest Editors**

Fuel cells are emerging as one of the most promising technologies for clean energy generation. Fuel cells are electrochemical devices converting chemical energy to electrical and thermal energy.

This Special Issue covers current trends and future developments in fuel cell technology. Theoretical, experimental, and analytical original research, as well as reviews articles, are welcome.

# Keywords

- fuel cell
- performance
- durability
- catalyst
- energy conversion
- hydrogen
- electrochemical
