submissions:

closed (15 November 2023)

Message from the Guest Editors

Dear Colleagues,

Digital signal processing has been widely used in many fields, such as motion control, vibration measurement and power conversion. The advanced technologies in digital signal processing have become increasingly important to precise motion control, active vibration control and high-efficiency power conversion.

This Special Issue focuses on vibration signal measurement, active vibration control, power conversion, etc. We invite the submission of the latest high-quality contributions covering theoretical developments and practical applications of vibration measurement and vibration control, including but not limited to the following technical areas:

- Digital signal processing;
- Sensor technology;
- Multi-sensor information fusion;
- High-performance circuits;
- Vibration measurement;
- Vibration control;
- Motion control;
- Power conversion.

an Open Access Journal by MDPI

Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
