# **Superconducting Machines Performance Optimization**

Guest Editor:

### Dr. Dong Liu

School of Energy Systems, LUT University, FI-15210 Lahti, Finland

Deadline for manuscript submissions:

15 July 2024

# **Message from the Guest Editor**

Superconducting machines are being considered and proposed for high-power-density or high-torque-density applications, such as propulsion motors for aviation and marine and power generators for wind turbines. The method of designing superconducting machines has not vet been agreed upon since there are many options under consideration, such as partial or full superconducting, iron or ironless core, distributed or concentrated windings, various superconductor types and their prices, cryogenic cooling methods, etc. It is necessary to devise the best designs for certain conditions. Otherwise, this technology will be unable to advance to commercialization. Identifying the best designs requires the optimization and quantitative comparison of the optimum designs of all the possible options. However, optimization of superconducting machines is rather challenging since analytical methods may not be sufficient and finite element methods may be involved in the optimization program.

## **Editor-in-Chief**

#### Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

# **Message from the Editor-in-Chief**

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science),

CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2(*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
