Engineering, University of
Catania, 95124 Catania, Italy

Deadline for manuscript
submissions:

15 August 2024

Message from the Guest Editor

Dear Colleagues,

In recent times, the technological spheres of Blockchain and the Internet of Things (IoT) have emerged as significant disruptors, with both leading a wave of innovation in their respective domains. Their intersection is now poised to redefine our approach to digital infrastructure and interconnected systems.

Blockchain, known for its decentralized and secure architecture, has evolved beyond its cryptocurrency roots to become a foundational technology for various sectors, ensuring data integrity and trust in digital transactions. Its adoption in many areas, highlights its versatility and capacity to address complex data challenges. Conversely, IoT has been instrumental in driving the connected world, offering real-time data collection, automation, and enhanced operational efficiency across diverse industries.

The integration of IoT with Blockchain opens up new avenues for secure, transparent, and reliable data exchange in interconnected systems. However, this integration also brings forth unique challenges related to scalability, interoperability, and energy efficiency that need to be addressed for optimal utilization.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
