## IoT Anywhere—A Low Power Sensors and Long-Range communication for IoT

Guest Editors:

### Dr. Joao Ferreira

Department of Information Sciences, Technologies and Architecture, University Institute of Lisbon, 1649-026 Lisbon, Portugal

### Prof. Dr. Nuno Cruz

Department of Electronics and Telecommunications and Computer Engineering, Instituto Politécnico de Lisboa, 1500-335 Lisbon, Portugal

### Dr. Patrick Grossetete

Cisco Internet of Things Connected Group, Cisco Systems, 11, rue Camille Desmoulins, 92782 Issy les Moulineaux CEDEX 9, France

Deadline for manuscript submissions:  
**closed (31 August 2021)**

### Message from the Guest Editors

This Special Issue aims to bring together researchers and application developers working on the intersection of IoT with next-generation low-power sensor development associated with distributed long-range communication, providing IoT applications with real-time, secure, and privacy-preserving computing. Research topics of interest include (but are not limited to):

- Optimization and trade-off analyses of connectivity/scalability versus energy
- Development of long-range IoT communication solutions for remote places
- Development of low-power sensors for a new range of IoT solutions
- Successful commercial implementation, deployment experiences, case studies, and lessons learned
- A testing solution of long-range IoT communication, evaluation, and testbeds
- Real-time IoT data analysis on the cloud, at the edge, and on the move, including localization, personalization, and contextualization of IoT data
- IoT security and privacy for IoT devices, also with limited computing resource and connectivity
- Remote IoT solutions including pollution management, smart farming, and disaster management
- New features for long-range technologies (i.e., over-the-air updates, jamming)

## Editor-in-Chief

**Prof. Dr. Flavio Canavero**

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Signal Processing)
