

Innovative AI Approaches for Emerging 6G Wireless and Computing Systems

Guest Editors:

Dr. Sherief Hashima

Computational learning theory team, RIKEN-Advanced Intelligence Center, Fukuoka 819-0395 Japan

Dr. Haithem Khallaf

Department of Electrical and Computer Engineering, McMaster University, Hamilton, ON L8S 4L8, Canada

Deadline for manuscript submissions:

closed (15 May 2024)

Message from the Guest Editors

In this Special Issue, original research articles and reviews that address the main research challenges associated with the application of online-learning-aided solutions to the handling of future 6G networks are welcome. Research areas may include (but are not limited to) the following:

- Innovative AI techniques for satellite-assisted communications;
- Innovative AI techniques for distributed resource provisioning;
- Advanced AI-based solutions for mmWave/THz channel estimation;
- Advanced AI-based solutions for UAV-based wireless communications;
- Advanced AI-based solutions for device-to-device (D2D) communications;
- Advanced AI-based solutions for cognitive radio systems;
- Advanced AI-based solutions for 6G-enhanced IoT networks;
- Advanced AI-based solutions for wireless power transfer systems;
- Advanced AI-based solutions for mobile/edge computing;
- Innovative AI-based solutions for V2V, V2I, and V2X scenarios;

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Signal Processing)
