# **Random Access Memory (RAM): Circuits and Applications**

Guest Editors:

#### Dr. Daniel Arumí

Departament d'Enginyeria Electrònica, Universitat Politècnica de Catalunya, Carrer de Colom, 11, 08028 Barcelona, Spain

#### **Dr. Salvador Manich**

Departament d'Enginyeria Electrònica, Universitat Politècnica de Catalunya, Carrer de Colom, 11, 08028 Barcelona, Spain

Deadline for manuscript submissions:

closed (15 March 2025)

### Message from the Guest Editors

RRAM is one of the standout candidates among the emerging memory technologies that has the potential to replace current devices for high-performance computing and digital/analog circuit applications. In fact, the application fields of RRAM go far beyond its initial use as memory devices. Its non-volatility properties and multilevel storage capability (MLC) make RRAM well suited for inmemory computing (IMC). Furthermore, it can serve as synaptic elements in neural networks for its ability to tune their resistance. These two approaches are expected to overcome the limitations imposed by the separation of CPU and memory, causing the 'von Neumann bottleneck' and 'memory wall' problem.

Although RRAM reports excellent properties in terms of its simple metal-insulator-metal (MIM) structure, easy compatibility with current CMOS technology, outstanding scalability, fast switching speed, and long data retention, there are still some problems related to controllability, variability, and endurance which may limit its extensive application. This Special Issue invites submissions devoted to overcoming such limitations and developing RRAMbased applications.

## **Editor-in-Chief**

#### Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

#### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases. **Journal Rank:** JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
