Information Technology, Lund  
University, SE-221 00 Lund,  
Sweden

**Dr. Geoffrey Ottoy**

Department of Electrical  
Engineering, KU Leuven, 9000  
Ghent, Belgium

Deadline for manuscript  
submissions:

**15 November 2024**

### Message from the Guest Editors

This SI aims to delve into a diverse array of potential technologies and methodologies, encompassing Radio-Frequency (RF) Wireless Power Transfer (WPT), advancements in 6G networks, distributed architectures, and innovative energy harvesting techniques. We seek contributions that not only address the challenges of energy neutrality in IoT devices but also pioneer new approaches and solutions to propel the field forward and contribute to sustainable development.

One of the critical aspects we aim to tackle in this Special Issue is the extension of IoT device lifetimes, which poses a significant challenge on the pathway to more sustainable IoT ecosystems. Examples of research directions are modular IoT devices, where parts of the devices are recuperated and repaired, and end-of-life time recovery systems. Studies regarding life-cycle analysis are imperative towards sustainable IoT. Moreover, from pioneering localisation techniques to novel methods of powering and communicating with IoT devices, we invite submissions that challenge existing paradigms and expand the horizons of sustainable wireless technologies.

an Open Access Journal by MDPI

Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
