Control Strategies of Energy Storage Systems in Microgrids

Guest Editors:

Dr. Mohammad Abusara

Faculty of Environment, Science
and Economy, University of
Exeter, Penryn Campus, Penryn,
Cornwall TR10 9FE, UK

Dr. Walid Issa

Department of Engineering,
Maths and Physics, College of
Business, Technology and
Engineering, Sheffield Hallam
University, Sheffield S1 1WB, UK

Deadline for manuscript
submissions:

1 August 2024

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to present the latest research in the control strategies of ESSs for microgrids and modern electrical networks.

Topics of interest for this Special Issue include, but are not limited to, the following:

- Control strategies of ESSs: primary, secondary, and tertiary control;
- Control of grid forming/grid following converters for all types of energy storage systems;
- Energy management system of islanded microgrids, interconnected microgrids, and grid-connected microgrids;
- Machine learning and AI-based energy management systems for ESSs;
- AI-based power distribution management systems;
- Intelligent energy distribution systems;
- Centralized, decentralized, and coordinated energy management systems;
- Coordinated control of smaller energy storage systems;
- Grid ancillary services of ESSs;
- Low voltage ride through of ESSs;
- Modeling and stability analysis;
- Black start from ESSs.

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
