Modeling and Simulation of Electric Vehicle, Hybrid Electric Vehicle, and Intelligent Vehicle Dynamics

Guest Editors:

Dr. Pu Gao

School of Mechanical
Engineering, Beijing Institute of
Technology, Beijing 100081,
China

Dr. Shida Nie

School of Mechanical
Engineering, Beijing Institute of
Technology, Beijing 100081,
China

Dr. Yue Wang

School of Mechanical
Engineering, University of
Science and Technology Beijing,
Beijing 100083, China

Deadline for manuscript
submissions:

16 November 2024

Message from the Guest Editors

This Special Issue calls for papers that explore the dynamic modeling, simulation, and analysis of electric vehicles, hybrid electric vehicles, and intelligent vehicles in complex driving scenarios.

We invite authors from all fields of science that fall under the broader umbrella of electric vehicles, hybrid electric vehicles, and intelligent vehicles, including but not limited to the following:

1. All aspects of induction electric vehicle, hybrid electric vehicle, and intelligent vehicle dynamics.
2. Modeling, simulation, and analysis of electric vehicles, hybrid electric vehicles, and intelligent vehicles.
3. Electric motor/generator technologies for electric vehicles, hybrid electric vehicles, and intelligent vehicles.
4. Energy management, speed planning, eco-driving control, and dynamic control (in the field of intelligent electric vehicles).
5. Novel applications of electric vehicles, hybrid electric vehicles, and intelligent vehicles.
6. Vehicles for safety-critical applications.
7. Online and offline condition monitoring techniques of vehicles.
8. Optimal design methodologies of vehicles.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
