Breakthroughs in Sustainable Energy and Economic Development

Guest Editors:

Prof. Dr. Magdalena Ziolo

Faculty of Economics, Finance
and Management, University of
Szczecin, 70-453, Aleja Papieža
Jana Pawła II 22A, Szczecin,
Poland

Dr. Isabel Novo-Corti

Department of Economics,
University of A Coruña, 15071 A
Coruña, Spain

Prof. Dr. Diana-Mihaela Țîrcă

Department of Management and
Business Administration, Faculty
of Economics, “Constantin
Brâncuși” University of Târgu-Jiu,
210135 Târgu-Jiu, Romania

Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editors

Dear Colleagues,

Countries worldwide are trying to create the necessary conditions for the green transformation to become a fact. An example is the actions taken by the European Union, which has adopted, among other measures, documents such as the European Green Deal, supporting the achievement of climate neutrality. CO₂ emissions from pollution sources such as transport, energy, and heating constitute a fundamental problem. Therefore, one of the challenges facing global society remains the transition to and implementation of renewable energy sources and, consequently, energy transformation and energy market transition. This transformation is closely related to issues such as sustainable development and growth. In the era of digitization, including the age of digital finance, attention is drawn to their positive and negative impact on carbon footprint/ On the one hand, digitization means a lower risk of deforestation. Conversely, for example in terms of, cryptocurrency markets, their development exert a high level of demand on energy consumption.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
