Faculty of Electrical Engineering  
and Communication,  
Department of Electrical Power  
Engineering, Brno, Czech  
Republic

Deadline for manuscript  
submissions:

**closed (20 April 2019)**

### Message from the Guest Editor

Dear Colleagues,

Nowadays, electrical energy transmission and distribution is considered a critical infrastructure in industrially developed societies, and its protection regarding safety and security threats is being more and more common. The fact that this infrastructure is geographically spread across huge areas, together with fast development of distributed energy resources (DERs), which influence the direction of power flow in both distribution and, sometimes, in transmission grids, bring difficult technological challenges for the real-time prevention, detection, and precise localization of anomalies.

Prof. Dr. Petr Toman

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
