submissions:

closed (31 March 2019)

Message from the Guest Editors

Dear Colleagues,

We would like to invite original research or review articles to a Special Issue of the journal *Energies* on the topic of “Fuels of the Future”. Fuels are the main energy sources providing power for transportation, power plants, chemical plants and space exploration. Concerns over the depletion of fossil fuels and environmental problems caused by using conventional fuels have promoted the development and search for sustainable alternatives.

The Special Issue of aims to gather innovative and original research articles on various solid, liquid and gaseous fuels from the perspective of production, properties and performance in engines, combustion processes and other energy system applications.

Prof. Dr. Tony Roskilly

Prof. Dr. Xiaoli Yu

Dr. Yiji Lu

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
