Life Cycle Assessment of Renewable Energy Sources

Guest Editors:

Prof. Dr. Vincenzo Franzitta

Department of Engineering,
Energy Section, University of
Palermo, 90128 Palermo, Italy

Prof. Dr. Marzia Traverso

Institute of Sustainability in Civil
Engineering, RWTH Aachen
University, 52062 Aachen,
Germany

Dr. Domenico Curto

Department of Engineering,
University of Palermo, 90128
Palermo, Italy

Deadline for manuscript
submissions:

closed (29 February 2020)

Message from the Guest Editors

The journal *Energies* is delighted to announce the Special Issue “Life Cycle Assessment of Renewable Energy Sources”, examining the life cycle assessment (LCA) of different types of renewable energy: solar energy, wind energy, ocean energy (e.g., wave and tidal energy), solar energy in sea offshore applications.

In recent years, the marine energy industry has experienced an increasing level of interest and activity in the development of a broad range of technologies, involving blue skies research, the commercialization of marine energy conversion technologies, sea tests of devices, array deployments, and the design of new concepts. This Special Issue aims to capture the latest advances in marine energy application research and development, which will accelerate the implementation of new technologies and the expansion of the industry on a global scale.

We invite all researchers active in the broad and fascinating domain of LCA of renewable energy sources to submit articles to this Special Issue.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
