## Innovation Research in Micro Scale Flows and Combustion

Guest Editors:

**Dr. Maria Grazia De Giorgi**

Department of Engineering for  
Innovation, University of Salento,  
Via Per Arnesano, I-73100 Lecce,  
Italy

**Dr. Donato Fontanarosa**

Department of Engineering for  
Innovation, University of Salento,  
Lecce, Italy

**Prof. Dr. Antonio Ficarella**

Department of Engineering for  
Innovation, University of Salento,  
Via Per Arnesano, I-73100 Lecce,  
Italy

Deadline for manuscript  
submissions:

**closed (15 March 2023)**

### Message from the Guest Editors

In recent years, microscale flows and combustion have aroused growing interest in both academic research and industrial communities, and its complex and unstable nature calls for further explorations aiming to discover new techniques and technological solutions to enhance the heat/mass transfer and combustion processes in such microfluidic devices. In this regard, the numerical and experimental methodologies for the characterization of these flows are constantly evolving. Specific topics of interest for this Special Issue include, but are not limited to:

Heat and mass transfer in microscale flows; Multiphase flows and phase change in microscale flows; Fundamentals of microscale combustion; Experimental methods for the characterization of microscale flows and microcombustion; Numerical methods and simulations for microscale flows and microcombustion; Microfabrication technologies and additive manufacturing; Micromixers, microreactors, microturbines, and microcombustors; Micro-propulsion systems and microengines; Micro heat transfer systems: microchannel systems, micro-evaporators, micro heat sinks, micro heat exchangers, and microcoolers.

## Editor-in-Chief

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
