Engineering, and Digital
Technologies, Teesside
University, Middlesbrough TS1
3BX, UK

Deadline for manuscript
submissions:

5 December 2024

Message from the Guest Editor

Dear Colleagues,

The design and operation of cities is under increasing pressure due to changes in population, climate, and congestion. In this Special Issue, the core theme will be digital engineering and how it can provide a platform for smarter, cleaner, and more sustainable cities. Specific themes of interest include (but are not limited to): Technologies for Smart Cities (IoT, Web 3.0, AI, and Machine Learning, Robotics/Domotics); Decarbonisation of Industry and Transportation; Smart Buildings, Smart Infrastructure, and Smart Energy; eMobility and Smart Logistics. Submissions are invited from researchers and practitioners working in related areas, with the aim of promoting a venue for cutting-edge fundamental and applied research related to digital engineering for future smart cities.

Prof. Dr. Michael Short

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
