## Energy Efficiency in Smart Homes and Grids

Guest Editors:

**Prof. Dr. Anna Fensel**

Wageningen Data Competence  
Center, Wageningen University &  
Research, 6708 PB Wageningen,  
The Netherlands

**Dr. Juan Miguel Gómez Berbís**

Computer Science Department,  
Universidad Carlos III de Madrid,  
Madrid, Spain

Deadline for manuscript  
submissions:

**closed (20 May 2020)**

### Message from the Guest Editors

This Special Issue focuses on advancements in the energy efficiency of smart homes and smart grids. This encompasses smart homes, smart grids, smart cities and villages, ICT solutions for efficient energy consumption, as well as energy production and distribution. This Special Issue is especially interested in receiving high quality, unpublished submissions that focus on advancing the technologies for sensor infrastructures, knowledge management and engineering, as well as user engagement: in particular, energy savings should take place without a decrease in residents' quality of life. We are interested in back-end technologies, such as for the predictive maintenance and optimization of energy distribution and consumption, as well as in front-end technologies, such as end user interfaces, gamification and techniques facilitating behavior change. Further, data are playing an increasingly important role in energy efficiency, and are gaining a leading role in various domains, such as future building certification, smart grid and meter management, and predictive maintenance.

## Editor-in-Chief

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
