Automotive Engines Emissions and Control

Guest Editor:

Prof. Dr. Evangelos G. Giakoumis

School of Mechanical
Engineering, National Technical
University of Athens, Athens,
Greece

Deadline for manuscript
submissions:

closed (31 May 2017)

Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to gather innovative research and highlight recent advances on the very timely and sensitive subject of exhaust emissions from internal combustion engines. It is a well established fact that exhaust emissions from engines contribute significantly to environmental pollution and greenhouse gases on a global scale. Topics of interest for the Special Issue include (but are not limited to):

- Production mechanisms and pollutants formation in spark ignition engines and diesel engines;
- Exhaust after-treatment systems: three-way catalysts, oxidation catalysts, diesel and gasoline particulate filters, selective catalytic reduction, NO_x adsorbers;
- Internal measures for emissions control (exhaust gas recirculation, water injection, etc);
- Combustion noise from diesel engines;
- Alternative fuels and biofuels effects on pollutants emissions;
- Influence of alternative combustion systems, such as HCCI, PCCI and RCCI, on pollutants formation.

Prof. Dr. Evangelos G. Giakoumis

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
