Power Grid on Energy Great Transition with High Penetration of Renewable Energies

Guest Editor:

Prof. Dr. Jung-Wook Park

School of Electrical & Electronic
Engineering, Yonsei University,
Seoul 03722, Korea

Deadline for manuscript
submissions:

closed (28 February 2019)

Message from the Guest Editor

Dear Colleagues,

The objective of this Special Issue is to address, discuss, and present the novel theories, methods, and applications to the power grid on energy great transition. Topics of interest for publication include, but are not limited to:

- Methods to obtain the grid-connected flexibility and maximize the allowable capacity
- New system structures with interconnection of AC and DC
- Smart inverter and active distribution system
- Applications of FACTS and HVDC
- Short-term and long-term planning of power system with the high penetration of renewable energies
- Cooperative operation and energy management of transmission and distribution systems
- Converter-level and plant-level controls of wind power and photovoltaic generations
- Short-term and long-term grid-level cooperative control for different types of power plants
- Improvement of stability with respect to frequency and voltage of system
- Real-time fast state estimation algorithms

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
