Group of Environmental Geography, Section of Integrated Environmental Science, Faculty of Environmental Earth Science, Hokkaido University W-5, N-10, Sapporo 060-0810, Japan

#### Dr. Ram Avtar

Graduate School of Environmental Science, Hokkaido University, Sapporo, Japan

Deadline for manuscript submissions:

closed (31 July 2023)

## **Message from the Guest Editors**

Dear Colleagues,

Land-use changes are discussed not only in relation to climate change, but also to political and socio-economic changes. Such interactions between humans and environments are receiving more attention in today's society. Because of its complexity, land science involves broad communities. This Special Issue is seeking original, unpublished papers that describe recent advances and efforts in various land-use and land-cover-change issues in relation to changing environments, not only from a GLP (Global Land Project) community standpoint but also from that of non-GLP communities. This Special Issue invites research papers addressing the state of the art in developing the concepts and tools for an effective analysis at different scales. Research results and discussions. especially those targeting contributions to exploring the research framework with co-design and co-production for Future Earth (http://www.futureearth.org/), are highly welcome. Papers selected for this Special Issue are subjected to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments. applications in the and environments

## **Message from the Editor-in-Chief**

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal Environments, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.

**Journal Rank:** CiteScore - Q1 (*Ecology, Evolution, Behavior and Systematics*)
