Message from the Guest Editors

Sustainable management of resources has become an issue of concern due to the massive and rapid aggravation of the environment by the discharge of anthropogenic pollutants. Much effort has been undertaken in the investigation of: applicable technologies for environmental quality improvement; transport and distribution of concerning pollutants and management for the sustainable use of environment resources.

This joint Special Issue between *Environments* and the International Conference on Contaminated Land, Ecological Assessment and Remediation (CLEAR 2016, 20–27 November 2016, Taiwan) is focused on the innovative/significant new findings in the field of environment pollution, remediation technology, contaminant transport and fate in the environment, ecological monitoring and restoration, risk assessment and management of land resource sustainability. The participants of CLEAR 2016 are encouraged to submit full research/review articles to this Special Issue. Additionally, we also welcomes full research papers from experts and scholars in related fields.

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **PubAg**, **AGRIS**, **GeoRef**, and **other databases**.

Journal Rank: CiteScore - Q1 (*Ecology, Evolution, Behavior and Systematics*)
