Deadline for manuscript
submissions:

25 October 2024

Message from the Guest Editor

Dear Colleagues,

Micropollutants have the capacity to disturb physiological processes, resulting in unfavorable neurological, immune, developmental and reproductive effects on both humans and wildlife. These substances are frequently detected in aquatic ecosystems and encompass active pharmaceutical ingredients (APIs), personal care products (PCPs), pesticides and microplastics. In natural waters exposed to sunlight (surface waters), solar-radiation-mediated degradation constitutes an important natural depuration process of micropollutants, especially those resistant to biological degradation. However, these natural processes might not be enough to remove such substances, and complementary remediation strategies must be explored. These strategies can include advanced wastewater treatment technologies, the development of best practices in agriculture and industry to reduce pollutant inputs, and policy measures to limit the release of micropollutants. This Special Issue seeks research papers dealing with advances in micropollutant detection, environmental fate and removal in waters, to provide a well-rounded and complete understanding of the topic.

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **PubAg**, **AGRIS**, **GeoRef**, and **other databases**.

Journal Rank: CiteScore - Q1 (*Ecology, Evolution, Behavior and Systematics*)
