Message from the Guest Editor

Dear Colleagues,

Membrane Bioreactors (MBR) have had a great development as of the last few decades. The notable development of MBR in industry has been for wastewater treatment. The advantage of MBR is to create high cell density in bioreactors, and, therefore, to reduce the retention time of the fermentation process. As the technology develops, the attention to MBR for other applications in fermentation processes, to produce energy, biofuels, and biomaterials, is increasing. This Special Issue is dedicated to exploring advanced applications and developments of MBR in fermentation technology.

Prof. Dr. Mohammad J. Taherzadeh

Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. Proposals for editing a special issue for a particular topical area are always welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biotechnology & Applied Microbiology*) / CiteScore - Q2 (*Plant Science*)
