Deadline for manuscript  
submissions:

**closed (20 September 2022)**

### Message from the Guest Editors

Dear Colleagues,

Fishes, the most species-rich vertebrates in the animal kingdom, are valuable samples in studies on the historical and contemporary evolution of organisms. Climate changes, overfishing and habitat losses have led to rapid declines in fish populations and species. Studies on population genetics and conservation are vital to help us understand and reduce the risk of population and species extinctions. With the fast development of sequencing-based technologies, genome-wide molecular markers provide new insights into population genetics and conversation.

This Special Issue focuses on population genetics and conservation of fishes, including—but not limited to—identification of genomic signatures associated with population divergence, determination of the genetic basis of phenotypic traits possessed by different populations, processes on population over ecological time scales, linkage disequilibrium as expected for species with a large population size, adaption with selective sweeps and polygenic selection, etc.

## Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubAg](#), [FSTA](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Marine & Freshwater Biology*)
