### Message from the Guest Editors

Dear Colleagues,

The journal *Fishes* is preparing a Special Issue entitled “Application of Environmental DNA Technology in Fishery Resources”. Analysis of environmental DNA (eDNA) has emerged as a powerful and versatile tool to inform decisions in the management of fisheries resources, including commercial, subsistence, and recreational fisheries as well as ecological services dependent on healthy and abundant fish populations. Monitoring with eDNA is especially well-suited to studies of rare species, either for early detection of aquatic invaders, or for the investigation of species of conservation concern. This Special Issue will highlight studies that utilize the unique advantages of eDNA analysis in non-invasive detection, species specificity, sensitivity of detection, and ease of sampling to answer questions and solve problems in fisheries management. Studies of innovative approaches to sampling and detection are also welcome.

Dr. Catherine A. Richter

Dr. Richard F. Lance

## Editor-in-Chief

**Prof. Dr. Maria Angeles Esteban**

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

## Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubAg](#), [FSTA](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Marine & Freshwater Biology*)
