## Microbiology Research in Meat and Meat Production

Guest Editors:

**Prof. Dr. Beniamino T. Cenci-Goga**

Department of Veterinary  
Medicine, University of Perugia,  
06121 Perugia, Italy

**Dr. Paola Sechi**

Department of Veterinary  
Medicine, Laboratorio di  
Ispezione degli alimenti di origine  
animale, University of Perugia,  
Italy

Deadline for manuscript  
submissions:

**closed (15 April 2019)**

### Message from the Guest Editors

Meat safety and the protection of consumer interests, along with quality of production, are of increasing concern to the public. Other important topics in the agenda of the so-called “research-policy interface” include the effect of micro-organisms in meat, and the factors affecting the growth and survival of micro-organisms, along with meat preservation, public health issues, foodborne diseases, methods for laboratory analysis and quality control of meat production.

Meat production and consumption is therefore a very interesting topic, which includes safety, quality, nutritional, ethical, and marketing aspects, because food is more than a metabolic fuel. It has physiological, psychological, social, cultural, and aesthetic associations that merge to form a gestalt that people endorse and maintain. The contribution of any food towards an individual’s wellbeing is as complex as the individual. In this context, the benefits of consuming food that contains hazards may even outweigh some risks.

## Editor-in-Chief

### Prof. Dr. Arun K. Bhunia

1. Department of Food Science,  
Purdue University, West  
Lafayette, IN, USA

2. Department of Comparative  
Pathobiology (Courtesy), Purdue  
University, West Lafayette, IN,  
USA

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg,** and **other databases.**

**Journal Rank:** JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Health Professions (miscellaneous)*)
