Deadline for manuscript
submissions:

closed (30 April 2024)

Message from the Guest Editors

Food contamination can occur by multiple routes, and the identification of the source can be challenging; this leads to delays in stopping the spread of pathogens and increases the possibilities for human infection. With the intensification of the food industry, new methodologies to improve the tracking of these causative agents are required, and molecular techniques are key for this depth assessment. Genotyping can allow the reconstruction of evolutionary patterns associated with specific outbreaks and identify the genetic potential and environmental risk factors of the bacteria identified.

This Special Issue will cover the different approaches used to study and trace pathogenic foodborne microorganisms; these will include, but not be limited to, molecular methods for the detection and characterization of microorganisms, bioinformatics analyses, among others. The aim is to expose the novelties in this area in order to improve the typing analysis in order to contain future outbreaks.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
