Deadline for manuscript submissions:

**closed (3 March 2023)**

### Message from the Guest Editors

Special Issue on “Application of Chromatography in Food Analysis” is a unique opportunity to gather the state of the art of chromatographic methods to control the safety and bioactivity of foods. This topic involves scientific communities working in pest control, the analysis of residues of pesticides and chemicals in foods, and also those laboratories working on the revalorization and characterization of bioactive compounds from any food commodities, providing an overview of the main trends in the area. Therefore, papers dealing with both chromatographic method development and the application of chromatographic methods on food topics, including raw materials, are welcome. Additionally, papers discussing the results from chromatographic analyses on food products or raw materials for food production will be included.

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg,** and **other databases.**

**Journal Rank:** JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Health Professions (miscellaneous)*)
