Message from the Collection Editor

In-depth high-level review articles are sought from a wellrecognized and well-established research community on topics from state-of-the-art knowledge to new advances and trends, including but not limited to the following: Emerging or neglected foodborne viral, bacterial, and parasitic diseases; Impact of food and food components on pathogen survival, transmission, and pathogenesis; Biofilm formation and the role of small molecules on biofilm formation and inactivation; Foodborne pathogens and microbial ecology in nontraditional protein sources, such as human food; Probiotic microbes and their application in foodborne pathogen prevention, inactivation, and control. We look forward to receiving your contribution to this Special Issue, which will host review papers providing valuable insights into all aspects of food microbiology, foodborne pathogens, and probiotics.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, Foods has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank: JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Health Professions (miscellaneous)*)
