Deadline for manuscript
submissions:

21 June 2024

Message from the Guest Editors

Global planetary changes are expected to have significant effects on all natural ecosystems, including forest ecosystems, causing serious declines in their distribution and ecological and conservation status. These changes are often critical drivers for important declines in forest composition, dynamics, and ecosystem processes, which can result in forest degradation and limitations. The ecological restoration of the declined forest ecosystems, based on the characteristics of declines, which vary in space and time according to climatic, physical, and biological factors, can contribute to a better balance and distribution of forest ecosystems across the world.

Thus, a better understanding of the degradation process and an analysis of the relationship between global changes and forest declines could lead to more effective methods to achieve successful ecological restoration of degraded forest ecosystems. Knowledge of the methods and techniques for a successful restoration is greatly needed to face the challenges created by global changes.

We should utilize this knowledge and translate it into forest or fire management strategies in the context of global change.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
